ACHIEVE ORDER2CASH (ACHIEVE O2C) OPTIMIZES THE ORDER-TO-CASH WORKFLOW FOR COMPANIES UTILIZING SAP BUSINESS ONE.

All aspects of the order-to-cash cycle from order processing, credit checking, fulfillment and shipping; to document management, invoicing and reporting are streamlined with Achieve O2C.

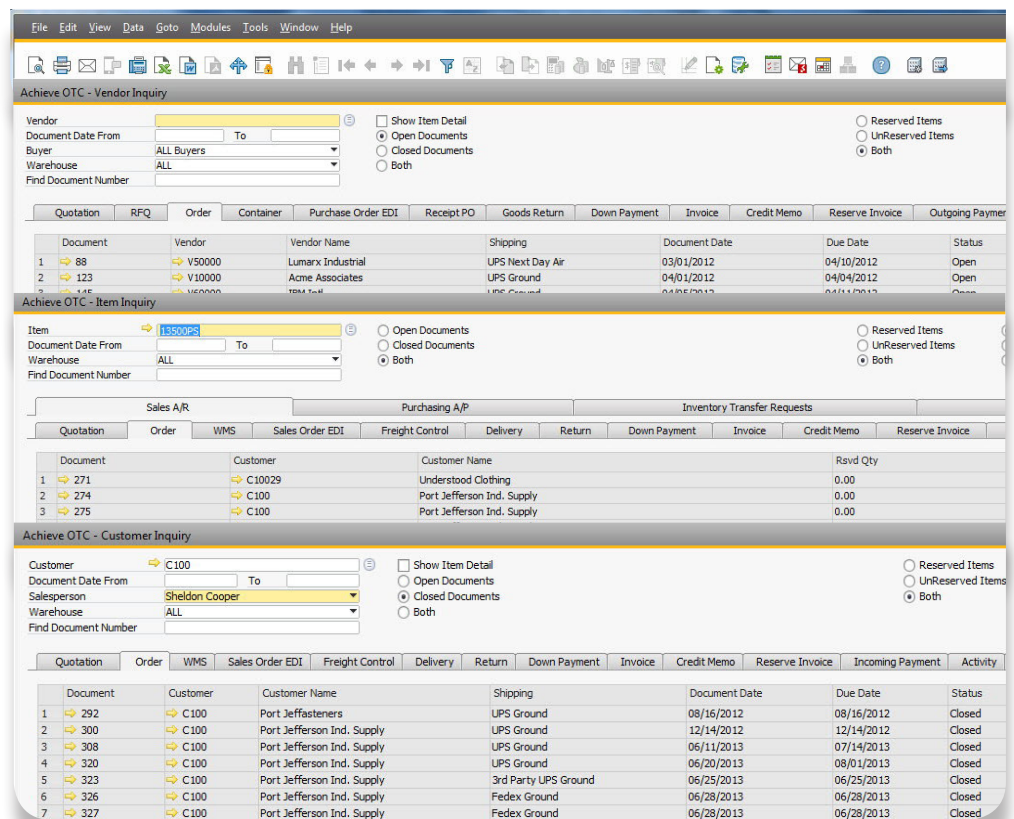

Utilizing Achieve O2C within your SAP Business One System, your company can improve customer service levels, profits and organizational efficiencies while freeing up working capital and cash flow.

SINGLE SOURCE SOLUTION

Many O2C programs being sold today are actually several individual software applications bundled together and marketed as a single 'solution pack'.

This bolt-on approach often leads to gaps in functionality, support challenges and often finger pointing between the vendors and customers. Achieve O2C is developed and supported by Achieve IT Solutions. This single-source approach provides SAP Business One customers and partners, one organization that is dedicated to the successful development and support of Achieve O2C.

Document	Vendor	Vendor Name	Shipping	Document Date	Due Date	Status
