

Grow your B2B Business with Magento and SAP Business One

Integrating SAP B1 and Magento to Create a Turnkey eCommerce Solution

Better Customer Service

- Synchronized inventory and up-to-the-minute product information provide a fantastic customer experience!
- Reduce order and shipping cycle time - get your products to customers faster!
- Store client information from online orders for utilization in marketing and sales initiatives.

Automation

- Eliminate duplicate data entry – orders placed on your website are automatically transferred to your ERP.
- Fewer errors – through integration you'll eliminate manual data entry and reduce the number of data entry errors.
- Automate order fulfillment process with secure transfer of information.

Increase Revenue

- Integration serves existing customers better with reduced order cycle time and increases chances of repeat sales.
- Streamline multiple business processes and reduce human involvement to increase internal productivity.
- Generate insightful reports on key metrics to leverage marketing and advertising campaigns.
