

Experience the Value of Inventory Optimization

Product Brochure

The Science and Power of Predictive Inventory Planning and Optimization

VALOGIX® MultiLink Inventory Planner manages an unlimited number of items and locations in a single database. Users have instant visibility to the Master warehouse, to field stock, and everything in between. The proprietary planning engine efficiently plans for each item/location combination based on its unique characteristics. For example, a regional warehouse replenishes lower level and field locations; therefore, it is both a supplier and warehouse location. This allows VALOGIX MultiLink to handle different lead times, costs, and other variables for more precise planning.

Inventory Analysis

MultiLink gives you instant information on every item in your inventory. Active, Excess and Inactive items are automatically segmented for high visibility and ease of planning and managing. This information is archived in MultiLink so you can track progress from one year to the next.

Item Number	Description	Location	Unit Cost	12 Mth Forecast	Fcst Period
A00001	IBM Inforprint 1312	01	242.55	15,554	6,139

Rolling Aging Trends Graph - Total Inventory - Active - Excess - Inactive

Records: 14 of 34
Sorted By: ITEM NUMBER, Ascending

Aging Analysis: ALL LOCATIONS

Total Inventory: 2,430,142

Active: 2,003,033

Excess: 422,522

Inactive: 4,587

Aging Analysis: ALL PLANNERS

Total Inventory: 2,430,142

Active: 2,003,033

Excess: 422,522

Inactive: 4,587

Selected Excess Period: 6 Months

VALOGIX MultiLink forecasts future demand, creates a balanced optimized inventory, and creates new purchase orders and transfers automatically. MultiLink gives employees more time to focus on ways to improve their business like satisfying customers and vendor relations. And there is the added benefit of improving positive cash flow quickly, and with less time and effort.

Add/Edit Stocking Location					View Location Relationships	
ID	Location Code	Location Name	Type	Supplied By		
1	01	General Warehouse	C	01	01	
2	02	NY	R	01	02	
3	03	West Coast	R	01	03	
4	04	Drop Ship	R	01	04	
5	Transit	Transit	C		Transit	

Location replenishment is setup during implementation allowing MultiLink to properly forecast, plan and replenish every item at every location. MultiLink can manage an unlimited number of items and locations.

MultiLink Includes These Additional Capabilities:

Valogix solutions help you reduce inventory costs, improve employee productivity, increase equipment uptime, satisfy more orders the first time and increase customer satisfaction and loyalty. MultiLink provides planning by location and user for improved control and efficiency.

Multi-Location Visibility and Planning

You can view either Item History or Forecast with the Valogix Stocking Location Visual Network. You can see one or all levels at a glance. Select history or forecast data for any item by month. The automated roll-up function shows totals as the data displays from the lowest level up to the highest level.

Location	JAN	FEB	MAR	APR	MAY	JUN	JUL	AUG	SEP	OCT	NOV	DEC	Total
NEW YORK	7	6	8	5	6	4	100	0	0	0	0	0	136
CHICAGO	12	9	13	9	10	6	5	0	0	0	0	0	64
LOS ANGELES	10	8	12	7	8	6	5	0	0	0	0	0	56
Total (Roll-up)	29	23	33	21	24	16	110	0	0	0	0	0	256

Additional Key Features:

- ◆ **Rapid Item Locator** - lets you search for any item in inventory
- ◆ **Auto Scheduler** - provides automatic scheduled imports of data
- ◆ **All-in-One Planning Engine** - robust planning engine provides complete end-to-end planning
- ◆ **Right Mouse Button Commands** - provides quick access to key functions
- ◆ **Hot Keys** - access to key functions at your fingertips
- ◆ **System Generated Optimal Stocking Quantity** - eliminates need for manually setting reorder points and min/max quantities
- ◆ **User Customizable Features** - the personal touch that enhances ease of use
- ◆ **Reverse Logistics** - manages returns and repairs for maintenance and service organizations
- ◆ **New Item Planning** - use the Proxy History function to automatically generate a forecast and plan for new items
